Disclaimer

• Statements made by Unisys during today’s presentation that are not historical facts, including those regarding future performance, are forward-looking statements under the Private Securities Litigation Reform Act of 1995. These statements are based on current expectations and assumptions and involve risks and uncertainties that could cause actual results to differ from expectations. These risks and uncertainties are discussed in the company’s reports filed with the SEC.

• Forward-looking statements include, but are not limited to, any projections of earnings, revenues, annual contract value (“ACV”), total contract value (“TCV”), new business ACV or TCV, backlog or other financial items; any statements of the company’s plans, strategies or objectives for future operations; statements regarding future economic conditions or performance; and any statements of belief or expectation.

• Although appropriate under generally accepted accounting principles (“GAAP”), the company’s results reflect charges that the company believes are not indicative of its ongoing operations and that can make its profitability and liquidity results difficult to compare to prior periods, anticipated future periods, or to its competitors’ results. These items consist of revenue, post-retirement and cost-reduction and other expense. Management believes each of these items can distort the visibility of trends associated with the company’s ongoing performance. Management also believes that the evaluation of the company’s financial performance can be enhanced by use of supplemental presentation of its results that exclude the impact of these items in order to enhance consistency and comparativeness with prior or future period results. The following measures are often provided and utilized by the company’s management, analysts, and investors to enhance comparability of year-over-year results, as well as to compare results to other companies in our industry: Non-GAAP Operating Profit; EBITDA and Adjusted EBITDA, Non-GAAP Diluted Earnings per Share; Free Cash Flow and Adjusted Free Cash Flow; and Constant Currency.

• This year we will be reporting non-GAAP revenue and related measures as a result of the adoption of the new revenue recognition rules under ASC 606 to exclude revenue that had previously been recorded in 2017 under ASC 605. For more information regarding these adjustments, please see our earnings release and our Form 10-Q for the quarter. From time to time Unisys may provide specific guidance regarding its expected future financial performance. Such guidance is effective only on the date given. Unisys generally will not update, reafﬁrm or otherwise comment on any prior guidance except as Unisys deems necessary, and then only in a manner that complies with Regulation FD.
