Federal Market & Strategy Overview for Investors
Presented by Venkatapathi Puvvada (PV)
Senior Vice President/President, Unisys Federal
September 18, 2017
Disclaimer

- Statements made by Unisys during today’s presentation that are not historical facts, including those regarding future performance, are forward-looking statements under the Private Securities Litigation Reform Act of 1995. These statements are based on current expectations and assumptions and involve risks and uncertainties that could cause actual results to differ from expectations. These risks and uncertainties are discussed in the company’s reports filed with the SEC.

- Although appropriate under generally accepted accounting principles (GAAP), the company’s results reflect charges that the company believes are not indicative of its ongoing operations and that can make its profitability and liquidity results difficult to compare to prior periods, anticipated future periods, or to its competitors’ results. These items consist of pension and cost-reduction and other expense. Management believes each of these items can distort the visibility of trends associated with the company’s ongoing performance. Management also believes that the evaluation of the company’s financial performance can be enhanced by use of supplemental presentation of its results that exclude the impact of these items in order to enhance consistency and comparativeness with prior or future period results. The following measures are often provided and utilized by the company’s management, analysts, and investors to enhance comparability of year-over-year results, as well as to compare results to other companies in our industry: Non-GAAP Operating Profit; Non-GAAP Diluted Earnings per Share; Free Cash Flow and Adjusted Free Cash Flow; EBITDA and Adjusted EBITDA; and Constant Currency.

- From time to time Unisys may provide specific guidance regarding its expected future financial performance. Such guidance is effective only on the date given. Unisys generally will not update, reaffirm or otherwise comment on any prior guidance except as Unisys deems necessary, and then only in a manner that complies with Regulation FD.

- These presentation materials can be accessed on the Unisys Investor website at www.unisys.com/investor. Information in this presentation is as of September 18, 2017, and Unisys undertakes no duty to update this information.
Agenda
Understanding the Unisys U.S. Federal Sector

What **drives** the market and buying decisions?

What **solutions** does Unisys offer to meet the market’s needs?

Where does Unisys fit in the U.S. Federal market and how does it **differentiate** itself?

How does Unisys make **money** in U.S. Federal?

What are the **opportunities** Unisys sees within the U.S. Federal Sector?
Unisys U.S. Federal Overview

Industry Leader

As recognized in IDC MarketScape Government SI category*

Long-Term Client Relationships

90 clients across the government, many decades-long relationships; world class client satisfaction

Well-Positioned for Market Trends

Key areas of focus and top clients aligned with budget priorities

Highly-Skilled Resources

Deep expertise in Application & Infrastructure Modernization, Cloud Migration, Digital Enablement and Data Analytics

Solid Financial Performance

3% ’13 -’16 organic revenue CAGR in a declining market

First portion of Unisys to “Verticalize”

• Has operated in vertical structure for 8 years
• Recent revenue and margin trends indicate successful model
• Using lessons learned to help with company-wide vertical strategy

Mission partner and award-winning innovator

Key IT Federal Market Drivers

BUDGET

FY 2018 IT Budget Request: $95.7B
FY 2017 vs. 2018 IT Budget Request: 1.7% Growth

POLICY

## Customer Needs

### Current Customer Needs
- Migration of Infrastructure and Applications to Secure Cloud
- Application Modernization / DevOps
- Advanced and Predictive Analytics
- Cybersecurity
- IT Infrastructure/Network Consolidation/Data Center Optimization
- Cost savings from Operations & Maintenance to fund Modernization programs

### Future Customer Needs (3+ Years)
- Securing Internet of Things (IoT) with data management
- Software-Defined Infrastructure and Security
- Artificial Intelligence
- Data Insights – Machine, Deep and Cognitive Learning
- Identity Intelligence – Biometrics and trusted tools

### Implications for Strategy
- Government priorities aligned to Unisys capabilities & areas of strength
- Go To Market and Targeted growth agency prioritized with deal pipeline activities
- Investments to enhance capabilities and future needs
## Unisys Solutions and Products in U.S. Federal

### Industry Application Products

- **Government**
  - Digital Investigator™
  - LineSight®
- **Commercial**
  - AirCore®
  - Digistics™
  - ActiveInsights™ PharmaTrack

Delivering Innovative Solutions

Implemented and operates a large secure storage private cloud for the IRS for all applications including tax processing, tax administration and collections.

Designed and developed one of the world’s largest Big Data Predictive Analytics offerings to assess and manage security risk from passengers and cargo entering the country.

Successfully transitioned service desk operations for 1.4 million U.S. Army end users. Deployed Unisys VantagePoint™ and ITSM as a Service solutions.

Integrated and deployed biometrics and border security solutions at all major U.S. land border crossings. Tracking over 1.3 million transactions daily.

Provide full lifecycle services for the Department of Justice Asset Forfeiture Management System to enable federal, state and local law enforcement agencies to manage $3B assets annually.
Success Story
U.S. Customs and Border Protection

• Established, designed & implemented a portfolio of high end application systems to screen passengers and cargo entering the United States.

• Advanced data analytics targeting system built to assess inbound traffic
  – One of the largest big data analytics platforms in the Government
  – 1.3B transactions and 60B queries per day

Key results
• Protecting the critical by keeping American borders safe
• Keeping the “bad guys” out 24/7 365/year
• More agile & efficient processes
• Multiple complex systems modernized
• Retaining highly-skilled cleared professionals with rapid deployment

Unisys U.S. Federal Growth Positioning and Differentiation

- A reputation of successful delivery on its commitments to help agencies achieve their goals by introducing new technologies and business processes faster
- Global commercial expertise in Security, Cloud, Agile at Scale Application Services, DevOps and End User solutions
- Vertical domain expertise focuses solution to achieve mission outcomes
- Operates at the speed of a small business while providing the capabilities of a large global IT provider

Innovative solutions to resolve complex client challenges
U.S. Federal Revenue Models

Contracting in Government

- Government procurements are heavily regulated under Federal Acquisition Regulation (FAR)
- Longer life cycle for large procurements – can take 2-3 years
- Government uses three contract types: Cost Plus Fee, Time & Materials, Firm Fixed Price
  - Typically require cost detail to be disclosed and audited
  - Many agencies prefer Cost Plus contracts which cap margins
- To achieve small business mandates, agencies:
  - Issue a portion of their procurements only to small businesses
  - Require a specific percentage of content in large business contracts to be delivered by small businesses
- Government can choose award criteria of “Best Value” (where vendors differentiate with their solution offerings) or Low Cost Technically Acceptable
- Majority of the contracts are five years, but funded annually
- Unisys has been in the Federal market for several decades and has mature systems and processes as well as major contract vehicles to compete for contracts
U.S. Federal Market Opportunities

Opportunities We Are Well Positioned For

- Positioned well with agencies that are expected to get increased spending in IT (e.g., DHS, Justice, Army, Air Force)
- One of leading market players with proven capabilities in Cloud, Agile Development, IT Modernization, IT Service Management and End User services
- Unisys investments in Stealth, Biometrics and Security solutions align well to key Cyber Security priorities of agencies
- Ability to provide Global commercial best practices and vertical industry expertise differentiates Unisys from other Federal System Integrators
- An agile operational leadership team that focuses on white glove service delivery and world class client satisfaction to deliver exceptional mission outcomes for clients
